Risk Notice

Real persons who purchase or trade Diyarbekirspor Token undertakes the following risks.

Liquidity Risk: Crypto assets may lose value when being converted into fiat currencies. This loss reveals the liquidity risk in the market.

Market Risk: The crypto asset market is generally known for high volatility, it is in linear proportion with the prices that occur in independent digital asset platforms in the market. High volatility in crypto assets can cause price and liquidity differences between platforms.

Systematic Risk: Crypto assets projects can be considered as startups and among the reasons why the targeted project could not be successful; Systematic risks may arise in case of regulatory regulations, force majeure (war, natural disaster, political and political developments) and possible technological impossibilities (reconciliation, technological, etc. other problems of the Ethereum network).

Reputational Risk: The loss of crypto assets by crypto-asset holders, any infrastructure and service failures that may occur on the network and extensive reputational losses due to collaborations with third parties can pose risks.

Nonsystematic Risk: Risks that may arise before, during and after the issuing of crypto assets, providing their operations and reaching the end user. This risk element includes the discharge of the relevant company, technological infrastructure deficiencies and cyber attacks, liquidity problems, legal disputes between cooperating companies and non-systematic risks accepted in traditional finance theories.

Legal Risks: These are the risks that may arise with the creation, amendment or repeal of the relevant legislation. As part of these risks, there may be violations of not only the legislation on crypto assets, but also other relevant legislation in the future.

Others Risks:

i) Risk of blockchain wallet address: If the private key required to access the assets on the blockchain is lost, there is a risk of losing access to the relevant assets, putting them under the control of others.

ii) Risk of Tax: The taxation schemes that may arise in relation to cryptoassets can create financial risks. This taxation may also bind crypto-asset projects and any company that carries out the operations of the projects, and natural/legal persons making purchases.

Dictionary

ERC-20: This protocol standard, which stands for "Ethereum Request for Comments - 20", contains a specific set of rules and conditions for creating tokens on the Ethereum network.

Smart Contracts: They are code directories that are developed with software languages on the blockchain such as solidity, python, etc., have fixed rules and run automatically on a distributed network.

Private Key: It is the authorization key required to perform any transaction on the blockchain. Private Key is created under certain cryptographic conditions and cannot be changed afterwards. A public key can be created by taking derivatives of private keys.

DLT: Distributed Ledger Technology is the general name given to storage methods in the upper category of blockchain technology. In addition to blockchain distributed ledger technology is the name given to the encrypted and timestamped processing of stored data.

Solidity: It is a programming language used to write or develop "Smart Contracts" that run on the Ethereum blockchain.

NFT: NFTs, short for non-fungible tokens, are unique and indivisible tokens. These tokens are generally produced on the Ethereum network in ERC-721 and ERC-1155 token standards.

ERC-721: Unlike the ERC-20 token standards, tokens are created that are not interchangeable, unconvertible and unpairable contains the Ethereum network token rules and standards.

Fan Token: These are blockchain digital assets that give fans the opportunity to support their favorite teams while earning various rewards, discounts, campaigns and unique experiences.

Utility Token: Tokens that offers a certain service or advantage to its holders. It does not grant any share rights.

Diyarbakirspor

Diyarbakirspor started its adventure in football history in 1977 under the name Tarım Dođanspor. In 1986, the name of the club was changed to Beşyüzevlerspor. Bedirhan Akyol, who has been the chairman of the club since 1998, and businessman Fevzi İlhanlı acted jointly and changed the name of the club to Yeni Diyarbakırspor in 2010. The colors of the club were decided as Green-Red. Diyarbakır completed the 1st Amateur Division in the 2010-2011 season as the champion. Club finished first in its group in the play-off classification played within the scope of the Regional Amateur League. Having completed the 2nd Group as champion in the 2011-2012 season, Yeni Diyarbakırspor qualified to play the 3rd League promotion play-off and became the Champion in the Regional Amateur League in the 2013 season .

The name of the club, which was Yeni Diyarbakırspor until 2015, was changed to Diyarbakirspor. Before the 2020-2021 season, the club announced that it changed its name to Diyarbakır Football Club and will continue with this name in the new season. However, the Arbitration Board did not accept this request, stating that there was another club with the same name. Diyarbakirspor completed the season as Champion and moved directly to the 2nd League.

Fan Tokens

The Fan Token Ecosystem is worth \$500 million worldwide, with more than 50 participating clubs as of 2021. This ecosystem includes millions of fans, clubs, individuals interested in digital assets, and technology enthusiasts. Within this scope, Diyarbekirspor Token will aim to take club and fan interaction to the next level and catch up with technological developments in the international ecosystem.

As in the rest of the world, the sphere of influence of football and football clubs is very large. In addition to the love of football, our country is rapidly adapting to technology with the effect of its young population. Digital technologies and products are very popular and usage rates are growing day by day in our country. Diyarbekirspor Club is a sports club that carries out commercial activities to organize and support all kinds of sports, social, artistic and cultural activities. At this point, it aims to train mentally and physically healthy and talented athletes and to provide all kinds of social assistance and solidarity among its members. Developing digital technologies have become an indispensable part of commercial activities in today's conditions. Like all institutions around the world, it is essential for clubs to adapt quickly to digital financial technologies. As Diyarbekirspor, we pay attention to financial technologies, which today's world focuses on, in order to achieve our goals for our country's values faster and to make them sustainable. We are building bridges between digital technologies, country's favorite sport and glories history to achieve our aims and reach large audiences across the country.

Diyarbakirspor Token

Diyarbakirspor Token (DIYAR), is a utility token that is produced with the ERC-20 standards on Ethereum blockchain. Diyarbakirspor Token, which takes its value from club success and fan interaction; It will act as a bridge between the fans and the club with the opportunities, gifts and similar advantages it will offer to its fans.

Diyarbakirspor Token, as a utility token produced for a specific purpose and used for this purpose, will ensure objectivity and reliability by realizing the interactions between the fans and the club on the Ethereum blockchain. For this purpose, fans can join the Diyarbakirspor Token ecosystem to support their club, express their opinions and benefit from various opportunities. As stated in this whitepaper, Diyarbakirspor Token will act according to the token economy that will protect the financial stability of the project and will ensure that it is a successful project by providing the services it has specified to its fans. In a nutshell, Diyarbakirspor Token can be considered as a loyalty token due to the interaction it establishes between the fans and the club.

Advantages of Diyarbekirspor Token

Diyarbekirspor Token (DIYAR) as a fan token it can offer its holders various advantages and unique experiences, as well as the opportunity to be active in club decisions. Fans will be able to go beyond just owning a token, they have the opportunity to realize the events of many fans' dreams and be included as a living part of the fan token ecosystem.

Below are the benefits that Diyarbekirspor Token holders can benefit from. Diyarbekirspor has the right to determine the benefits to be enjoyed by Diyarbekirspor Token holders from among the options listed below and the benefits to be provided may be changed from time to time, provided that they are among the options listed below.

- Knowledge competitions about teams and players,

will be presented to users within the application.

Economy of Token

Diyarbakirspor Token (DIYAR) is designed as a service token with a ten-year distribution plan and low inflation value. The token economy is planned to end in 2030 in order to maintain the financial stability and value of the token.

Diyarbakirspor Token crypto asset information, which was created in ERC-20 standards on the Ethereum network, is as follows.

Token's Name: Diyarbakirspor Token
Identifier: DIYAR

Maximum Supply: 210.000.000
Total Supply: 94.500.000

FTO: 63.000.000
Treasury: 105.000.000
Marketing: 21.000.000
Technology: 21.000.000

Diyarbakirspor Token (DIYAR) pre-sales will be made on the bitexen.com platform. Private sales processes will be made by Diyarbakirspor and ExenPay. The planned prices for pre-sale are as follows:

	Price	Lock Time	Supply
FTO Option 1	0,21	6 Months	21.000.000 DIYAR
FTO Option 2	0,42	None	42.000.000 DIYAR

Circulation Plan

Diyarbakirspor Token; It will be in circulation with a total supply of 12,600,000 in the first year, once the FTO and other reserves are in circulation. Diyarbakirspor Tokens, which will be unlocked in the following years, will be included in circulation, and treasury reserves will be included in circulation at a rate of 10% every year. Marketing and Technology reserves will be ready for use without locking. The marketing and technology budgets used will be shared as a report every six months.

Year	FTO	Treasury	Marketing	Technology
2021	42.000.000	10.500.000	21.000.000	21.000.000
2022	21.000.000	10.500.000		
2023		10.500.000		
2024		10.500.000		
2025		10.500.000		
2026		10.500.000		
2027		10.500.000		
2028		10.500.000		
2029		10.500.000		
2030		10.500.000		
Total	63.000.000	105.000.000	21.000.000	21.000.000

Circulation Plan

Diyarbekirspor Token will be in circulation with a maximum supply of 210.000.000.

- 94.500.000 in 2021
- 126.000.000 in 2022
- 136.500.000 in 2023
- 147.000.000 in 2024
- 157.500.000 in 2025
- 168.000.000 in 2026
- 178.500.000 in 2027
- 189.000.000 in 2028
- 199.500.000 in 2029

In 2030, 210.000.000 units will reach the total supply, excluding the amounts to be burned.

Inflation Rate

Diyarbekirspor Token (DIYAR) will proceed with a deflationary approach after the locked tokens in the pre-sale are included in circulation. With the decrease in the number of tokens in circulation, it is aimed to burn close to 10% of the supply until all the tokens are in circulation, thanks to the repurchase and production activities.

Buyback and Incineration

Every time Diyarbekirspor Club scores a goal 2.121 Tokens, if it completes the league in the top 4 rankings in the league it is included in 20,000 Tokens, if it is the champion of the league it is included in 1,000,000 Tokens, and if it is the champion in special cup tournaments 50,000 Tokens will be purchased from the markets and tokens will be burned.

For Diyarbekirspor Token burning, 20% of the revenues obtained in the Diyarbekirspor Token (DIYAR) mobile application and 5% of the NFT revenues will be used for repurchase from the market and burn mechanism.

	Treasury
Score	2.121
Ranking in first four	20.000
League Championship	1.000.000
In-app Revenues	%20
NFT	%5
Custom Tournaments	50.000

NFT

These tokens or assets, which were first revealed in 2015 using blockchain technology, are special works that do not replace each other, although they have unique characteristics. Each NFT is designed in such a way that it cannot be matched, replaced or exchanged with any other NFT, as it has its own unique value. These NFTs can be divided into different rarity categories and can be issued as collectibles.

All future NFT projects related to DIYARr Token and Diyarbekirspor will be carried out by Bitexen Teknoloji A.Ş. and Diyarbekirspor. Among these NFT projects, it is aimed to include many projects such as special moments of the club's past achievements, sounds, images and football player cards.
