Risk Notice

Real persons who purchase or trade Sakaryaspor Token undertakes the following risks.

Liquidity Risk: Crypto assets may lose value when being converted into fiat currencies. This loss reveals the liquidity risk in the market.

Market Risk: The crypto asset market is generally known for high volatility, it is in linear proportion with the prices that occur in independent digital asset platforms in the market. High volatility in crypto assets can cause price and liquidity differences between platforms.

Systematic Risk: Crypto assets projects can be consideredas startups and among the reasons why the targeted project could not be successful; Systematic risks may arise in case of regulatory regulations, force majeure (war, natural disaster, political and political developments) and possible technological impossibilities (reconciliation, technological, etc. other problems of the Ethereum network).

Reputational Risk: The loss of crypto assets by crypto-asset holders, any infrastructure and service failures that may occur on the network and extensive reputational losses due to collaborations with third parties can pose risks.

Nonsystematic Risk: Risks that may arise before, during and after the issuing of crypto assets, providing their operations and reaching the end user. This risk element includes the discharge of the relevant company, technological infrastructure deficiencies and cyber attacks, liquidity problems, legal disputes between cooperating companies and non-systematic risks accepted in traditional finance theories.

Legal Risks: These are the risks that may arise with the creation, amendment or repeal of the relevant legislation. As part of these risks, there may be violations of not only the legislation on crypto assets, but also other relevant legislation in the future.

Others Risks:

i) Risk of blockchain wallet adress: If the private key required to access the assets on the blockchain is lost, there is a risk of losing access to the relevant assets, putting them under the control of others.

ii) Risk of Tax: The taxation schemes that may arise in relation to cryptoassets can create financial risks. This taxation may also bind crypto-asset projects and any company that carries out the operations of the projects, and natural/legal persons making purchases.

Sakaryaspor

Sakaryaspor was founded in 1965 by combining the strengths of all the different football values of the city. The process officially started with the initiatives of Orhan Şeref Apak, the head of the football federation of the period and Fikret Aldinç who was the goalkeeper of Adapazarı Şekerspor at that time, as a guarantor for the football accumulation of the city of Sakarya.

The head of İdman Yurdu, one of the well-established teams in Sakarya, Atty. Ali Necdet Güven, Güneşspor club president Ethem Boran, Gençlik Birliği club president Şevket Başak, Ada Gençlik Club 2nd president Hamdi Uzel and accompanying managers came together and discussed all the dynamics of the city. and gathered their forces under one roof and started negotiations on establishing the city's only professional team On May 10, 1965. In Ethem Boran's program, the list of 20 people in İdman Yurdu, Ada Gençler, Gençler and Güneşspor, Sakaryaspor club's programs started on 17 June 1965.

Fan Tokens

The Fan Token Ecosystem is worth $500 million worldwide, with more than 50 participating clubs as of 2021. This ecosystem includes millions of fans, clubs, individuals interested in digital assets, and technology enthusiasts. Within this scope, Sakaryaspor Token will aim to take club and fan interaction to the next level and catch up with technological developments in the international ecosystem.

As in the rest of the world, the sphere of influence of football and football clubs is very large. In addition to the love of football, our country is rapidly adapting to technology with the effect of its young population. Digital technologies and products are very popular and usage rates are growing day by day in our country. Sakaryaspor Club is a sports club that carries out commercial activities to organize and support all kinds of sports, social, artistic and cultural activities. At this point, it aims to train mentally and physically healthy and talented athletes and to provide all kinds of social assistance and solidarity among its members. Developing digital technologies have become an indispensable part of commercial activities in today's conditions. Like all institutions around the world, it is essential for clubs to adapt quickly to digital financial technologies. As Sakaryaspor, we pay attention to financial technologies, which today's world focuses on, in order to achieve our goals for our country's values faster and to make them sustainable. We are building bridges between digital technologies, country's favorite sport and glouries history to achieve our aims and reach large audiences across the country.

Sakaryaspor Token

Sakaryaspor Token (SKRY), is a utility token that is produced with the ERC-20 standards on Ethereum blockchain. Sakaryaspor Token, which takes its value from club success and fan interaction; It will act as a bridge between the fans and the club with the opportunities, gifts and similar advantages it will offer to its fans.

Sakaryaspor Token, as a utility token produced for a specific purpose and used for this purpose, will ensure objectivity and reliability by realizing the interactions between the fans and the club on the Ethereum blockchain. For this purpose, fans can join the Sakaryaspor Token ecosystem to support their club, express their opinions and benefit from various opportunities. As stated in this whitepaper, Sakaryaspor Token will act according to the token economy that will protect the financial stability of the project and will ensure that it is a successful project by providing the services it has specified to its fans. In a nutshells, Sakaryaspor Token can be considered as a loyalty token due to the interaction it establishes between the fans and the club.

Score	2.754
Ranking in first four	20.000
League Championship	1.000.000
In-app Revenues	%20
NFT	%5
Custom Tournaments	50.000

SAKARYASPOR | bitexen

NFT

These tokens or assets, which were first revealed in 2015 using blockchain technology, are special works that do not replace each other, although they have unique characteristics. Each NFT is designed in such a way that it cannot be matched, replaced or exchanged with any other NFT, as it has its own unique value. These NFTs can be divided into different rarity categories and can be issued as collectibles.

All future NFT projects related to Sakaryaspor Token and Sakaryaspor will be carried out by Bitexen Teknoloji A.Ş. and Sakaryaspor. Among these NFT projects, it is aimed to include many projects such as special moments of the club's past achievements, sounds, images and football player cards.
